TRUK20171128001 - Seeking manufacturers of plastic extrusion parts for innovative backpack Technology collaboration REQUEST

Abstract

A UK company has developed an innovative new backpack and are seeking global manufacturers of plastic extrusion parts and injection-moulded plastic components. They are seeking companies with experience in prototyping plastic extrusions using different materials, and possibly with experience in manufacturing backpacks, to co-develop and create new parts via a manufacturing agreement or technical cooperation agreement.

Description

A UK company has prototyped a novel backpack that has increased ease of access to the wearer's belongings. The product has an innovative design that simply and dramatically improves ease of access for the wearer. The product is patent pending in the UK and more information can be provided once contact has been established.

The UK company is now seeking partners to create bespoke plastic parts for the products, with the aim of mass production. They are seeking manufacturers of both traditional bag components and new specialised plastic components to help devise from prototypes the materials for mass production. These might be research & development companies with experience in plastic extrusions or expertise within a manufacturer of high quality backpacks. They are seeking to collaborate via a manufacturing agreement or technical cooperation agreement to co-develop and create the new parts.

Target partner expertise sought:

- Type of partner sought: They are seeking a manufacturer of specialized plastic components with expertise in injection moulding, preferably with experience in plastic extrusions as well. They are also seeking manufacturers in traditional backpacks or materials for backpacks. Companies should have experience in prototyping plastic extrusions using different materials, to work with the UK company to devise the new plastic components.

- Specific area of activity of the partner: Type: Industry

Activity of partner: Manufacturing/R&D/Injection Moulding

Specific activity of partner: To work with the UK company to design and manufacture new plastic parts for the creation of new backpacks either by a manufacturing or technical cooperation agreement.

Key information:

Country of origin: UNITED KINGDOM

Listed under: Manufactura Industrial \ Tecnologías de Materiales \ Industria
